Expert knowledge, extensive programme of events, "live" shows during active operation of machinery, the use of tools and accessories necessary during stone processing.

Exhibitors about the fair

MACHPLUS

We have been present at the fair in Poznan for several years and we appreciate very good cooperation with the organizers. We show our machines here, introduce new products, and many meetings at the fair resulted in signed contracts. The fair is always a great opportunity to meet all the major players present in the stone market in Poland.

WEHA

The possibility of presentation of our company during the STONE fair STONE is always highly prestigious for us. The fair is the perfect place to talk with existing customers, with whom we maintain friendly cooperation, as well as a unique opportunity to establish new business relations. (...) The company's presence at the STONE fair confirmed the reputation of the products with the Weha logo.

H.M. TARN GRANIT

The STONE Fair in Poznan is the most important event in the stone industry in Central and Eastern Europe. That's why H.M. Tarn Granit is present here from the very beginning. Meetings with clients as well as the possibility of gaining new contacts, are just some of the advantages of the fair. (...) We warmly encourage you to visit our stand during STONE 2019.
